

1846 Share Price Index

The SPI, although shown as three segments, is a single row of values.
All movements are either left, down in value, or right, up in value.

The notes below are summaries.
Refer to game rules for full details.

| Amount of per share income | Movement |
|--|--|
| No income or less than half current price. | One value left. |
| At least half, but less than current price. | No change. |
| Equal to, but less than twice current price. | One value right. |
| At least twice, but less than three times current price. | Two values right. |
| At least equal to three times price. | Two values right if price is less than \$165, Three values right if price is at least \$165 . |
